V1.0-20200226

- Dual-display monitoring
- User-friendly interface and optimized workflow
- Connection via LAN/WLAN to 64 bedside monitors
- Support HL7/XML
- Monitoring data statistic and analysis
- Drug dose, Hemodynamic, Oxygenation, Renal function, Ventilation calculation
- Bi-directional communication with EDAN bedside patient monitors
- Time synchronization
- Remote NIBP measurement
- Batch management
- Patient info setup
- Alarm setup
- Privacy mode supported

MFM-CMS

Central Monitoring System

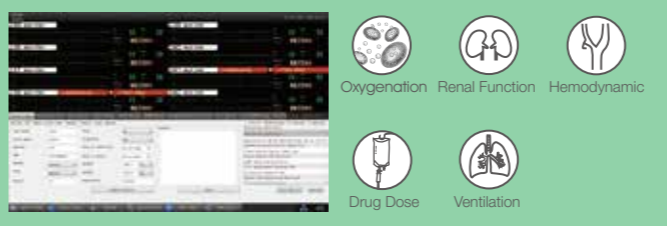

MFM-CMS brings you a comprehensive central monitoring solution for all EDAN bedside monitors. It offers seamless monitoring management from transportation to hospitalization, from intensive care to general care, bringing easy access to well-organized monitoring technology.

Storage capacity for each patient:

20,000 NIBP Review	20,000 Alarm Event	240 h Trend	240 h Full-disclosure Waveform	12 h Dynamic Short Trend
------------------------------	------------------------------	-----------------------	--	------------------------------------

Calculation Function

Five kinds of calculations are introduced in MFM-CMS to provide an overall clinical guidance including Drug Dose, Hemodynamic, Oxygenation, Renal Function and Ventilation calculation.

Statistic and Analysis

Besides monitoring statistic, the analysis for alarm event, ECG ARR and historical data can be showed in management window either in graphic or in tabular view.
